We, at Property Point, share a passion to grow the entrepreneurial spirit of South Africans. Property Point supports business growth and development to encourage job creation, economic growth, and sustainable businesses.

We nurture dynamic entrepreneurs and their businesses by providing opportunities for small and medium enterprises to grow, succeed and prosper within the South African property and other selected sectors.

Property Point is committed to meeting the applicable requirements of our partners, funders and our country's need for transformational and employment opportunities.

To facilitate our commitment, we have implemented a quality management system to manage our ability to satisfy our stakeholder and ISO 9001 requirements. We undertake to continually improve upon our performance and compliance.

To assist us we have developed quality objectives which are aligned to this policy and which are reviewed at management review meetings.
